EDUCATION

St. John's University, Collins College of Professional Studies

Bachelor of Science, Computer Science

January 2025

Master of Science, Computer Science

January 2026

EXPERIENCE

Cybersecurity & DFIR Investigative Analyst | Full-Stack Developer, T&M USA

August 2025 – Present

- Maintaining a Laravel enterprise platform (PHP, MySQL, jQuery/AJAX) generating five-figure monthly revenue, managing AWS infrastructure, APIs, authentication, and database architecture continuously performing cloud deployment, scaling, and security hardening
- Conducting DFIR investigations, malware analysis, dark web monitoring, and social media/ERBI intelligence analysis
- Collaborated with attorneys on pre-litigation matters that included investigations that are not limited to due diligence, OSINT, cyber forensics, surveillance, and social media monitoring
- Performing network reconnaissance and application security testing using Nmap and Burp Suite, translating findings into production security improvements and incident response

Website Developer & Social Media Manager, Women in Cyber Leadership

August 2024 – October 2024

- Helped to develop a website and created/maintained their presence on social media platforms and LinkedIn with groups and roles while creating posts to drive engagement, presented my work on a weekly basis

Cyber Security Intern, New York Metro InfraGard

May 2024 – October 2024

- Participated in all weekly events that bring critical infrastructure owners, operators and the FBI together, to provide education, information sharing, networking, and workshops on emerging technologies and threats.
- Gave presentations and participated in meetings that provided information about all the critical vulnerabilities and threats to our critical infrastructure as well as mitigation methods
- Developed cybersecurity marketing initiatives, including podcast production and branded challenge coins
- Participated in analyzing risk management, latest frameworks, threat vectors, and network and cyber security

Software Engineer, CTS Logistics

July 2022 - August 2022

- Built an asset/inventory tracking system (Java) that kept track of statistics and data about packages in a database using MySQL as a database administrator, giving presentations to the company pertaining to my work and how they can use what I've built to help them keep track of assets/inventory

PROJECTS

Electronic Health Record System, St. John's University

Software - Java

- Developed a secure patient portal and database to track admissions discharges, medications, and doctor's notes
- Implemented access controls and IAM policies, enforcing segregation of duties to protect sensitive patient data

Phi Delt Connect

Social Media - iOS Application

- Built an iOS social networking app (SwiftUI, Firebase) with real-time feeds, authentication, and user management
- Included core social features including posts, comments, likes, follows, and dynamic feed updates in real-time as well as a "For You" page with recommendations and search functionality

CERTIFICATIONS

AWS Certified Cloud Practitioner | AWS Certified Solutions Architect – Associate | Cellebrite Certified Physical Analyst

EXTRACURRICULARS

Phi Delta Theta Fraternity (NY Lambda)

November 2023 – November 2024

Treasurer

- Managed \$30K annual budget, cutting expenses 20% through improved financial controls
- Raised funds 15% through fundraising efforts while delivering weekly financial reports for transparency
- Presented budget strategies to executive leadership to enhance member experience and community service initiatives

Association for Computing Machinery - Member

September 2021 – January 2024

SKILLS

Java, JavaScript, C++, Python, Swift, Laravel, and Scala experience | Database Management | Data Analysis | IAM/Access Controls | Cyber Security | Software Development | Data Structures and Algorithms | Public Speaking | Trilingual – Greek, Spanish, English | Distributed Operating Systems/Cloud Computing | Hands-on SQL experience | Problem-Solving, Critical Thinking, Collaboration, Leadership | Working with AWS | Frameworks | Vulnerability Management | Threats | Working closely with Law Enforcement agents | Nmap & Burp suite | Website Development | Working with APIs | Convolutional Neural Networks | React, Node.js, Next.js, Flask | Large Language Models | Machine Learning | DFIR | Artificial Intelligence | Developing Agentic Systems and Workflows | Malware Analysis | Dark Web Monitoring | Intelligence | OSINT
